

1 What CALPOL® Blocked Nose Spray is for

CALPOL® Blocked Nose Spray is suitable for children aged 3 or above, pregnant women and adults.

CALPOL® Blocked Nose Spray is a preservative-free isotonic saline solution used for treating blocked, dry or irritated nasal passages caused by cold and flu, sinusitis, allergy including hay fever and post-nasal surgery. It works by rinsing and restoring moisture to the nasal passages/mucosa.

COLD AND FLU

When suffering from cold and flu your nasal lining becomes irritated which leads to production of more mucus than normal resulting in a runny and blocked nose. CALPOL® Blocked Nose Spray helps reduce nasal congestion by thinning the mucus and rinsing it away.

CALPOL® Blocked Nose Spray can aid with feeding and sleeping for children suffering from cold and flu as it acts to gently wash away the mucus that causes the blocked nose allowing your child to breathe more easily.

SINUSITIS

CALPOL® Blocked Nose Spray provides temporary relief of nasal congestion associated with sinusitis by effectively thinning and flushing away the mucus that causes the blocked nose.

ALLERGY including HAY FEVER

CALPOL® Blocked Nose Spray when regularly used will assist in washing away irritants that trigger allergies e.g. hay fever. By cleaning the nasal tissue, it washes away the irritants and so helps to minimise the symptoms associated with allergy, such as a runny or blocked nose and restore the normal cleaning function of the mucus membranes of the nose.

POST-NASAL SURGERY

CALPOL® Blocked Nose Spray will help remove dry blood and mucus crusts following nasal surgery.

2 How to use CALPOL® Blocked Nose Spray

Follow the instructions below to ensure that you use CALPOL® Blocked Nose Spray correctly:

- For nasal use only.

Warnings

- Keep out of the sight and reach of children.
- Do not use CALPOL® Blocked Nose Spray if you have known hypersensitivity to sodium chloride or to any of the other ingredients.
- One bottle should be used only by the same person as the use of this dispenser by more than one person may spread infection.

- If symptoms persist after 14 days, or worsen, or if new symptoms occur, stop use and consult a healthcare professional.

In the case of any serious incident that occurs with this product, please report this to the manufacturer and to your government's health authority. You can also report side-effects directly via the Yellow Card Scheme at: <http://www.mhra.gov.uk/yellowcard> or search for MHRA Yellow Card in the Google Play or Apple App Store. By reporting side-effects you can help provide more information on the safety of this medical device.

First Use

- Do not use if the packaging is damaged before opening.
- Remove the protective cap.
- To make sure your pump is working, test spray into the air before you use it for the first time and whenever you have not used it for a week or more.
- Hold the bottle away from you and press down until you can see a fine mist.

Children over 3 years and adults

- Insert the nozzle into the nostril. Keep the bottle vertical.
- Spray deep into the nostril by pressing the spray head once. It is recommended to breathe in through this nostril while holding the other closed.
- Repeat the application in the other nostril.
